Welcome to the Lanius CMS Official Website!

Hi all!

The new Lanius CMS Official Website is finally online, with all the Lanius CMS Project related services:

- [Lanius CMS Developers & Testers services](#)
- [Lanius CMS Users services](#)

The Drake CMS Official Website will be disabled, [old forums are available here](#) for historical purposes. The Drake CMS user accounts have been imported into the new Lanius CMS Official Website and then deleted from the Drake CMS Official Website. Accounts migrated from the previous website will be deleted if you do not login within 4 months.

You should have received an email containing your new account informations; if you have not, then either [Contact us](#) about the old account or [Register a new account](#)

I wish to publicly thank all the people who helped me at setting up the new Lanius CMS Project website and related services.

- consc198of [C&C Advanced Online Services](#) for providing the server and hardware support for it;
- [adriano7492](#) for designing the new Lanius CMS logo;
- rsavarese for designing the Lanius CMS Official Website template;
- trex1512 for giving a couple of hands on the website contents' setup;
- tashunka for the moral support;
- stigm for keeping working on the documentation;
- awrog for telling me about some server issues.

And thanks to our users

Really thank you.
